DETAILED ACTION

This is the first Office Action and claims 1-35 are pending and under consideration.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-22 and 31 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1,7 and 21-22 are rejected for the indefinite recitation of the phrase “a concentration of calcium ions” wherein it is unclear what concentration is intended.

Furthermore, it is unclear if one can leave the calcium ions and add counter ions without decreasing or removing calcium ions.

Claims 17 and 31 are rejected for the indefinite recitation of the phrase “the genetic recombination technique” wherein it is unclear which or what genetic recombination technique is being referenced.

Claims 2-6 and 8-22 are rejected for depending from rejected claim 1.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1654

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Bryant *et al.* 1983 (BioChem J. Vol. 211, pp. 709-716). Bryant *et al.* teaches a method for purifying mammalian duodenal calcium-binding proteins by contacting a sample comprising the binding protein with a cation exchange carrier in the presence of calcium ions and eluting the adsorbed binding proteins with a counter to the calcium ions to produce calcium ion-free binding protein.

Conclusions

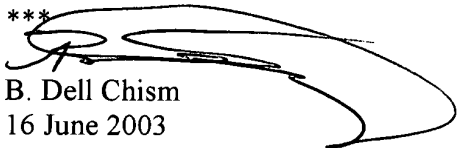

No claims are allowed. Claims 24-30 and 32-35 are objected to for depending from rejected claim 23.
